

Delta Gold[®]

By WINFIELD
UNITED

Protect Your Investment

Delta Gold[®] is an exclusive, proprietary pyrethroid insecticide with a low use rate and a short PHI for many crops. With the active ingredient Deltamethrin, Delta Gold[®] provides broad-spectrum control against a wide range of damaging insects in a variety of crops.

FEATURES AND BENEFITS

- Fast knockdown and activity over a wide range of temperatures
- Flexible application options
 - May be applied by ground, air, or chemigation
 - Compatible with many other herbicides, fungicides, and MAX-IN[®] nutrients
- Liquid formulation flows smoothly and disperses easily in water
- Controls a wide range of insects, including but not limited to: aphids, armyworms, cutworms, flea beetles, leaf rollers, lygus bugs, stinkbugs, sunflower moths and thirps

Delta Gold[®] Needs an Adjuvant for Maximum Effectiveness

Coverage throughout the crop canopy, including the lower leaves is critical for maximum efficacy. Delta Gold[®] should be tank-mixed with a crop oil concentrates like an COC or MSO.

Delta Gold[®] Application Rates

Crop	Rate (fl. oz. per acre)	PHI (days)
